

*Institut für Kommunikationstechnik  
Prof. Dr. P. Leuthold*

### **Recommendation**

In my quality as the president of the well-known biennial International Zurich Symposium & Technical Exhibition on Electromagnetic Compatibility (EMC) for more than 10 years I had the pleasure to get acquainted with Prof. Dr. Ryszard G. Struzak in the late seventies. Since that time, we always had good contacts and at present, I am very glad that he has accepted my invitation to cooperate in the Organizing Committee of another large conference, the IEEE International Conference on Communications which takes place in Geneva next year under my general chairmanship.

Prof. Struzak is a renowned expert in the area of radio science and engineering, especially in EMC. Apart of his excellent scientific activities at the Institute of Telecommunications in Wroclaw and simultaneously at the Technical University of Wroclaw until 1985 he was highly engaged in different international standardization bodies like ITU or CCIR, respectively, IEC, CISPR etc. Hence, his numerous papers deal mainly with radio frequency and EMC measurement methods, frequency management, planning and utilization as well as with modeling and simulation of electromagnetic interference. Due to this valuable work Prof. Struzak got the chance to join ITU where he is now Head of the Technical Department and Senior Counselor of the CCIR.

From a personal point of view I am always impressed by the very friendly and efficient cooperation with Prof. Struzak. Especially, I appreciate his reliability and his diplomatic skill in difficult negotiations. In addition, he is an experienced manager of research and development projects, workshops and conferences. Although he communicates easily with everybody his natural authority remains respected.

Concluding from this outline I do not hesitate to highly recommend Prof. Struzak as a staff member either in an industrial or university environment, e.g. as a head of a radio science & EMC division/group (R & D or standardization), as an organizer of continuous education programs or simply as a consultant in his areas of expertise.

Prof. Dr. Peter E. Leuthold  
Director, Communication Technology Laboratory,  
Head of the Electrical Engineering Department of  
the Swiss Federal Institute of Technology Zurich
