TO WHOM IT MAY CONCERN

I have the pleasure to know Professor Ryszard Struzak since 1987. I met him several times during international scientific conferences in the field of radiocommunications, but my closest contact with him has been in his position as Senior Counsellor of the International Radio Consultative Committee (CCIR) of the International Telecommunication Union and as lecturer in two Colleges and one Seminar under my direction.

As member of CCIR his advice and assistance has been of great help towards the activities of the Standing Committee on Developing Countries of the International Union of Radio Science (URSI) that I chaired. As lecturer at this Centre or in other activities organized by myself, he has demonstrated high academic standards. Those that have participated in the Colleges and Seminar have always recognized his disposition to discuss and give solutions to technical problems posed by them.

High professional knowledge and human excellence are the evident qualities of Professor Struzak.
